CSCI-101 Programming I - Lab 3b

This lab is due by 5:00 p.m. Friday, September 8. This includes pushing your .java files to GitHub.

Let's Code

Write a program in a file named **Sum3.java** that asks the user to enter in three integers, reads the integers from the keyboard, and then prints **"Sum: "** followed by the sum of the three integers.

Write a program in a file named **Product3.java** that asks the user to enter in three integers, reads the integers from the keyboard, and then prints **"Product: "** followed by the product of the three integers.

Write a program in a file named **Min3.java** that asks the user to enter in three integers, reads the integers from the keyboard, and then prints **"Min: "** followed by the smallest of the three integers entered by the user.

Write a program in a file named **Max3.java** that asks the user to enter in three integers, reads the integers from the keyboard, and then prints **"Max: "** followed by the largest of the three integers entered by the user.
