

Create a GitHub Account

You are about to create for an account on GitHub.com.

When creating your new account, **ONLY** use letters and numbers (a-z A-Z 0-9) in your GitHub username and in your GitHub password.

What did he say?

He said, when registering for a new GitHub account, only use letters and numbers (a-z A-Z 0-9) in your GitHub username and in your GitHub password.

I'm sorry, I didn't catch that.

HE SAID, "only use letters and numbers (a-z A-Z 0-9) in your GitHub username and in your GitHub password."

Ok, now that you know to only use letters and numbers (a-z A-Z 0-9) in your GitHub username and password, you're ready to create an account. ☺

In a browser, go to <http://github.com> and create an account.

Save your GitHub username and password in a secure location.

After creating an account, GitHub will send you an email to verify your email address. Please click on the link in the email to verify your email address.

Share your GitHub Username

I have created a GitHub repository for each student in class. In order for us to share the repository, I need to add you as a member of the repository's team.

Please come up to the front of the room and provide me with your GitHub username.

After I add you to the repository's team, you will get another email from GitHub, this time asking if you want to join the repository's team. Please click on the link in the email to join the team.
