CSCI-101 Programming I
Lab 6c

INSTRUCTIONS

Inside the **lab6** directory create a file named **Lab6c.java**. Inside the **Lab6c.java** file write a program that does the following:

I.   Create an array named **array1** that holds the values 1, 2, and 3.

II. Create an array named **array2** that holds the values 4, 5, and 6.

III. Create an array named **array3** that holds the values 7, 8, and 9.

IV. Create an array named **array4** that holds **array1**, **array2**, and **array3**.

V.   Print to the screen all 9 ints in **array4**.
