

CSCI-101 Programming I

Lab10 Part A

Log into cs.bridgewater.edu. Navigate to your labs directory. Make a directory named **lab10**. Inside the **lab10** directory, create a java program in a class named **Quiz6** that behaves as follows.

1. The class has a method named **main** that:
 1. Asks the user to enter 10 integers,
 2. Uses a for-loop to read the integers from the keyboard and store them in an array named **array1**,
 3. Uses a for-loop to print the values in the array to the screen.
