

CSCI-230 Web Scripting

HOMEWORK 2 - CHAPTER 1 AND 2

1. Using Visual Studio Code (VSC) create a subdirectory in your public_html directory for your coursework. Name the directory anything you like.
2. Add an index.html file in your coursework directory.
3. Add HTML code to index.html so that the page displays "Web Scripting Coursework".
4. Add a link to your homepage that redirects the user to your Web Scripting Coursework page.
5. Create a file named a2.html in your coursework directory.
6. Add HTML code to a2.html so that the page displays "Assignment 2"
7. Add a link to your Web Scripting Coursework page that redirects the user to your a2.html page.
8. Read and experiment with the code in chapters 1 and 2. While experimenting, print to the console to view the values in the variables you define. This task alone should take 1 - 2 hours.
