

CSCI-230 Web Scripting

HOMEWORK 3 - CHAPTER 3.1 & 3.2

1. Create a subdirectory named javascript (all lowercase) in your coursework directory.
2. Add a file in the javascript directory named a3.js. Rename (or delete) your previous a3.js file in the coursework directory (if you have one).
3. Create a file named a3.html in your coursework directory.
4. Add a link to your Web Scripting Coursework page that redirects the user to your a3.html page.
5. Add HTML code to a3.html so that the page displays "Assignment 3" and add a script tag, just above the closing <body> tag, that loads a3.js.
6. Copy the HTML from my Lecture 3 web page into your a3.html file.
7. Add HTML and JavaScript to your a3.html and a3.js file so that your calculator has 6 buttons that perform 6 different mathematical operations.
