

CSCI-231 Server-side Development

Assignment 1

Due 3:00 a.m. Tuesday, September 9

In the past I have shared a private GitHub repository with each of you.

1. Clone our shared repo onto your laptop if it is no longer on your laptop.
2. Create a directory named **csci231** in the base directory of the repo.
3. Change your working directory to your new **csci231** directory and create a sub-directory named **a1**.
4. Open your **a1** directory in Visual Studio Code.
5. Create three files in your **a1** directory: **DatabaseError.js**, **index.js**, and **database.js**.
6. I provided code for **DatabaseError.js** and **index.js** in Quiz 1. Copy the code for these two files from Quiz 1 into the corresponding files.
7. Write the code for **database.js**.
8. Most easily readable correct code wins.
9. When finished, push your code to GitHub.
