CSCI-430 Client-side Development
Course Syllabus
Spring 2023

Course Description

This course covers the design and development of rich reactive web UI's using front-end JavaScript frameworks such as Bootstrap, Angular.js, React.js and Vue.js.

Instructor

Eric McGregor, Ph.D.   Email: rmcgregor@bridgewater.edu
Office: McKinney Center, Room 243   Phone: 540.828.5754

Office Hours: posted outside McKinney 243, or by appointment

Meeting Times: MWF 10:00 a.m. - 10:50 a.m.

Course Materials

A personal laptop to be used in class.

Course Website: http://n0code.net/work/teaching/courses/csci432/spring2023.

Grading

Throughout the semester I will assign coursework that each will require you to create and deploy a web application. Each assignments will have a deadline and I will assess your work at some point after the deadline. You are free to continue working on an assignment after the deadline and after my assessment, but once I have posted a grade for an assignment, I will not reassessing it.

There will be no written exams in this course. During this course you will be evaluated solely on the web applications that you design, build, and deploy. Your applications should demonstrate professionalism, attention to detail, and skill.

Course and Classroom Policies

'Course and Classroom Policies, Spring 2023' can be found on the course webpage.

This syllabus may be adjusted throughout the course at the discretion of the instructor.
